

Conflicts between
the digital &
the natural analysis
worlds.

Digital is accepted
& entrusted to be
the generator & keeper

however, at best
digital is an
approximation of
anything $+\infty$ is
not digital in its
original form.

fire is a good servant but a bad master

proverb Fire is useful when monitored and controlled. Left unchecked, however, it is quite dangerous and destructive. Hey, we

need to blow out these candles before leaving the house. After all, fire is a good servant but a bad master.

TECHNOLOGY IS OUR SERVANT, NOT OUR MASTER

for as a servant, technology is helpful as an information tool, as transport, heating, shelter, crikey, technology is our Maslow's assistant!

However, once we near self actualisation, we must ensure our use of tech does not turn into a reliance, for as a master, technology becomes a distraction, or worse a realism replacement. We must remember that "virtual reality" is really just "actual fantasy". The tech wants us to believe in this alternate reality business, whereby we must push, on occasions, our reset buttons and pick up a piece of paper

and some charcoal and remind ourselves of our own creativity.

Technology is someone else's creationwhat's yours?

The way tech needs to be considered as an adjunct to our daily processes. Just as there are limits on advertising, should there be limits on tech?

Our lives are analog. It is the way we are wired.

To be digital is to be abnormal.

NEW MATERIALISM

Facts were once largely based on someone else's collection of data, now facts tend to be based on my group's collective vision.

It used to be, "it has rained for as long as we can tell, so therefore it is likely to rain again in the foreseeable future."

Now, "the way I see what is happening to the world, I predict that rain wont be happening in any significant quantity again."

Politics v Govenance v Ideology

New Materialism is a concern.

The Man-Machine Interface/Interaction

Cyborgs

As The Crow Calls.....in other words getting straight to the point, as in as the crow flies but the calls is a reference back to Graham Kennedy...if it feels good, and if noone is physically hurt, give it a go - their

emotions will catch up later.

digital world, environment, citizen

in an ante-digital world we would have been living in a world, an environment with fellow citizens.

Are we embracing or surreptitiously being conditioned?

My research and subsequent works engage in and with both contemporary and tradition methods and materials.

Fire is used as a literal connection to the servant/master proverb.

The inclusion of Gin and Tonic is to

emphasise not having a reason should be a barrier.

Explore, discover and make mistakes so long as you do not repeat your mistakes.
